

VOWS & VENUES

CLIENT TESTING & OPERATIONAL MANUAL

Comprehensive acceptance guide, testing credentials, system architecture, and operational workflows for India's premier luxury wedding & celebration marketplace.

ENVIRONMENT

Render Staging (Verified Isolated Cluster)

TARGET RELEASE

Production 2.0.0 (Enterprise)

AUDIT & TEST SCORE

100% Pass (24/24 Acceptance Tests)

DEPLOYED COMMIT

175db49 (Branch: staging)

1. MASTER URLS & TESTING CREDENTIALS

Below is the centralized access directory for the Vows & Venues platform. All portals connect to a dedicated, high-availability MongoDB Atlas replica cluster (vows_and_venues_staging) ensuring persistent data lifecycle with complete production isolation.

Security Notice: The staging administrative credentials were rotated and fortified following security acceptance standards. Test all administrative actions using the updated credentials listed below.

PLATFORM WEB LINKS

PORTAL NAME	LIVE URL (STAGING)	TARGET PRODUCTION URL
Customer Marketplace	vowsandvenues-staging.onrender.com	https://vowsandvenues.in/
Dedicated Admin Portal	vowsandvenues-staging.onrender.com/admin	https://admin.vowsandvenues.in/
Vendor Partner Portal	vowsandvenues-staging.onrender.com/vendor	https://vowsandvenues.in/vendor
System Health & DB Diagnostic	vowsandvenues-staging.onrender.com/api/health	https://vowsandvenues.in/api/health
Dynamic XML Sitemap	vowsandvenues-staging.onrender.com/sitemap.xml	https://vowsandvenues.in/sitemap.xml

TESTING CREDENTIALS MATRIX (ROLE-BASED ACCESS)

ROLE / TITLE	EMAIL ADDRESS	PASSWORD	ACCESS LEVEL
Super Admin	admin@vowsandvenues.in	Vows#Stg2026!SecureKey	FULL CONTROL
Operations Manager	ops@vowsandvenues.in	Vows#Stg2026!SecureKey	OPERATIONS & KYC
Finance Manager	finance@vowsandvenues.in	Vows#Stg2026!SecureKey	PAYOUTS & ESCROW

ROLE / TITLE	EMAIL ADDRESS	PASSWORD	ACCESS LEVEL
Vendor Manager	vendor.lead@vowsandvenues.in	Vows#Stg2026!SecureKey	VENDOR ONBOARDING
Content Manager	content@vowsandvenues.in	Vows#Stg2026!SecureKey	CMS & OFFERS
Support Agent	support@vowsandvenues.in	Vows#Stg2026!SecureKey	DISPUTES & TICKETS
Read-Only Analyst	analyst@vowsandvenues.in	Vows#Stg2026!SecureKey	READ-ONLY BI
Verified Vendor	thegrandpalace@lucknow.com	Vendor@2026	VENDOR CATALOG
Customer Account	customer@example.com	Customer@2026	DISCOVERY & CART

Self-Registration Supported: You can also register fresh, independent customer and vendor test accounts at any time via `/auth/signup` and `/vendor/register` to test real-time email validation and onboarding.

2. COMPLETE BUSINESS LIFECYCLE & HOW IT WORKS

Vows & Venues is engineered to handle the complete, high-stakes lifecycle of Indian destination weddings and multi-day celebrations. The platform connects three primary stakeholders:

Customers, Vendors, and Platform Administrators.

1

Customer Discovery & Multi-Vendor Customizer

Customers explore 36+ verified venues, Awadhi catering masters, candid photographers, luxury decorators, and bridal artists. The Event Builder allows assembling custom 5-service packages (e.g. Venue + Catering + Mandap + 4K Cinema + Bridal Makeup) into a unified celebration plan with instant budget recalculation.

2

Date Availability & Collision Prevention Shield

Before confirming reservations, the platform checks vendor calendar availability. If a premier heritage venue is already booked for that date or marked as a blackout date by the vendor, the booking is rejected immediately with an informative **HTTP 409 Conflict** response, preventing embarrassing double-bookings.

3

Split Advance Payment & Multi-Vendor Cart Checkout

Indian wedding celebrations involve large capital outlays. The platform implements a standard **25% Advance Booking Deposit** model. Customers pay 25% online to lock all vendors for their auspicious wedding date, with the 75% balance scheduled for payment milestones.

4

Automated Commission & Vendor Settlement Ledger

Upon booking confirmation, the platform automatically generates immutable financial settlement records. The platform calculates a **10% to 15% platform take-rate commission**, crediting the net balance to the vendor's pending payout ledger for administrative release upon milestone completion.

5

Vendor Verification (KYC) & Catalog Moderation

Vendors submit trade licenses (GST, PAN, FSSAI hygiene ratings for caterers) and high-resolution portfolio albums. Administrative staff reviews and verifies credentials before activating public booking status with the coveted **Gold Verified Badge**.

6**Zero-Code Content & SEO Management**

Marketing and Content Managers control homepage hero titles, festive promotional strips, promotional coupon codes (e.g. R0YAL2026 for ₹15,000 off), and customer testimonials directly from the Admin Portal without requiring software redeployment.

3. STEP-BY-STEP CLIENT TESTING GUIDE

Follow these exact procedures to test each portal and observe real platform capabilities.

PART A: CUSTOMER MARKETPLACE TESTING FLOW

Portal URL: `https://vowsandvenues-staging.onrender.com/`

Login: `customer@example.com` / `Customer@2026`

1. **Browse Curated Venues:** Open the homepage. Filter venues by city (e.g., *Lucknow, Jaipur, Udaipur*) or category (*Venues, Catering, Photography*).
2. **Open Event Builder:** Navigate to the *"Build Your Event"* tab in the top menu. Select a date (e.g., December 2026) and add services (Venue + Catering + Decor) into your package.
3. **Apply Promotional Discount Code:** In the checkout summary, enter coupon code `ROYAL2026` and click *Apply*. Observe an instant flat discount of **₹15,000** applied to the total.
4. **Test 25% Split Advance Payment:** Toggle the *"Pay 25% Advance to Reserve"* option. Observe the payment amount adjusting to 25% of the total with transparent milestone breakdown.
5. **Complete Booking & Receive Confirmation:** Submit the booking. You will receive an official booking confirmation with an automated reference number (e.g., `VV-2026-XXXX`).
6. **Inspect Customer Dashboard:** Click your profile avatar to view *My Bookings*. Review your active bookings, download payment receipts, or initiate a reschedule request.

PART B: VENDOR PARTNER PORTAL TESTING FLOW

Portal URL: `https://vowsandvenues-staging.onrender.com/vendor`

Login: `thegrandpalace@lucknow.com` / `Vendor@2026`

1. **Vendor Dashboard Overview:** Log in to access the vendor portal. View incoming leads, booking requests, and overall performance statistics.
2. **Manage Service Packages & Pricing:** Navigate to the *"Services & Packages"* tab. Add or edit per-plate catering rates, royal venue bundles, or photography packages.
3. **Manage Calendar Blackout Dates:** Navigate to *"Availability Calendar"*. Mark any auspicious wedding date as unavailable (Blackout Date).
4. **Test Double-Booking Shield:** Attempt to book that blacked-out date from the customer portal. Confirm that the platform prevents the duplicate reservation.
5. **Track Payout Settlement Ledger:** Open *"Payouts & Settlements"* to view gross earnings, platform commission breakdown (10%), and net payable balances.

4. SUPER ADMIN PORTAL DEEP-DIVE & TESTING

The dedicated Admin Portal provides end-to-end platform governance, real-time financial tracking, content management, and security oversight.

Admin Portal URL: `https://vowsandvenues-staging.onrender.com/admin`

Super Admin Login: `admin@vowsandvenues.in` / `Vows#Stg2026!SecureKey`

ADMIN FUNCTIONAL VERIFICATION CHECKLIST

1 Live Operational KPI Dashboard

Upon login, the dashboard displays live metrics aggregated directly from MongoDB: Gross Booking Value (GMV: ₹18.4L+), Net Platform Commission, Collected Cash, Total Bookings, and Active Vendors.

2 Vendor KYC & Catalog Moderation

Navigate to **Vendors** tab. Search for any vendor (e.g. *The Royal Nawabi Palace*). Click the "Verify / Unverify" toggle button. The status updates in real-time in the database, instantly reflecting on the customer-facing website.

3 Bookings Oversight & Status Transitions

Navigate to **Bookings** tab. View all multi-vendor reservations, customer details, payment statuses (*Advance Paid* vs *Fully Paid*), and transition booking states from *Pending* to *Confirmed* or *Completed*.

4 Zero-Code CMS & Hero Section Editor

Navigate to **CMS & Content** tab. Edit the hero headline, announcement strip text, or promotional offers. Click "Save Changes". Open the customer homepage in a new tab to see your modifications immediately live without a code deployment.

5 Promotional Discount Engine

Navigate to **Coupons** tab. Create a new coupon code (e.g., `VIPWEDDING`) with flat discount or percentage savings, minimum order value, and expiry date. Test applying the code in customer checkout.

6 Team Management & Granular RBAC

Navigate to **Team & Staff** tab. Super Admins can create sub-admins, assign specific roles (*Finance Manager*, *Operations Manager*, *Support Agent*), and toggle permissions.

7

Immutable Security Audit Log

Navigate to **Audit Logs** tab. Every privileged action (admin login, KYC verification, CMS update, payout approval) is recorded in an immutable audit ledger with timestamps, user IDs, and client IP addresses.

5. INDEPENDENT ACCEPTANCE AUDIT RESULTS

An automated, 24–point acceptance audit suite was executed directly against the deployed staging environment (<https://vowsandvenues-staging.onrender.com>). All 24 core acceptance criteria achieved a **100% PASS rate**.

ID	TEST DESCRIPTION	OBSERVED STAGING EVIDENCE	VERDICT
1.1	Database & Service Health Check	MongoDB Atlas (vows_and_venues_staging), Uptime verified	PASS
2.1	Route Check: /adminssvg (Unintentional)	Clean HTTP 404 (Proper route is /admin)	PASS
2.2	Route Check: /vendorssvg (Unintentional)	Clean HTTP 404 (Proper route is /vendor)	PASS
2.3	Route Check: /svg (Unintentional)	Clean HTTP 404 (Lucide React Icons utilized)	PASS
2.4	Route Check: /api/healthsvg (Unintentional)	Clean HTTP 404 (Proper endpoint is /api/health)	PASS
3.1	Super Admin Login with Rotated Password	admin@vowsandvenues.in -> Token issued, Role: super_admin	PASS
3.2	Invalid Password Authentication Rejection	HTTP 401 Unauthorized returned	PASS
3.3	Anonymous Call to Protected /api/admin/stats	HTTP 401 Unauthorized returned	PASS
3.4	Forged / Tampered JWT Signature Rejection	HTTP 401 Unauthorized returned	PASS
3.5	Customer Calling Protected Admin Endpoint	HTTP 403 Forbidden returned	PASS
4.1	MongoDB Staging Durability & Record Insertion	Inserted unique labeled coupon record	PASS
4.2	Persistent Record Retrieval Across Requests	Verified coupon retrieved from MongoDB database	PASS

ID	TEST DESCRIPTION	OBSERVED STAGING EVIDENCE	VERDICT
5.1	Admin Vendor Verification Toggle	PATCH /api/admin/vendors/:id/verify -> Verified: true	PASS
5.2	Double-Booking / Blackout Collision Shield	HTTP 409 Conflict returned (DATE_BLACKOUT)	PASS
5.3	Valid Multi-Vendor Booking Creation	Created booking with ID (VV-2026-XXXX), Status: 201	PASS
5.4	Booking Status Transition	PATCH /api/bookings/:id/status -> Status: confirmed	PASS
6.1	Sandbox Payment Webhook (HMAC-SHA256)	Signature verified, sandbox mode enforced	PASS
6.2	Webhook Replay Idempotency Protection	Duplicate event rejected safely (Replay Safe)	PASS
7.1	Zero-Code CMS Content Verification	Hero headline & announcement fetched successfully	PASS
7.2	Dynamic SEO Metadata Configuration	SEO title & description configured	PASS
7.3	Staging Search Engine Isolation (robots.txt)	Directive confirmed: User-Agent: * Disallow: /	PASS
7.4	Edge Middleware X-Robots-Tag Header	Header verified: noindex, nofollow, noarchive	PASS
7.5	Dynamic XML Sitemap Route (/sitemap.xml)	Valid XML document generated dynamically	PASS
8.1	Immutable Security Audit Log Recording	Logged 30+ operational actions in audit cluster	PASS

Audit Summary: 24 of 24 Acceptance Tests Passed (100% Success Rate). Zero blockers identified for client review.

6. PRODUCTION RELEASE & DNS SETUP PLAN

The platform architecture is prepared for immediate production deployment upon client sign-off. Below is the exact DNS and deployment configuration for `admin.vowsandvenues.in` and `vowsandvenues.in`.

CUSTOM DOMAIN DNS CONFIGURATION

DOMAIN	RECORD TYPE	VALUE / TARGET HOST	TTL / PROXY STATUS
<code>vowsandvenues.in</code>	A / ALIAS	216.24.57.1 (Render Edge Anycast)	Auto / DNS Only (or Proxied)
<code>www.vowsandvenues.in</code>	CNAME	<code>vowsandvenues.onrender.com</code>	Auto / Proxied
<code>admin.vowsandvenues.in</code>	CNAME	<code>vowsandvenues-admin.onrender.com</code> (or staging/production target)	Auto / Proxied (Cloudflare SSL)

PRE-PRODUCTION LAUNCH CHECKLIST

A**Production Database Provisioning**

Create an independent, production-tier MongoDB Atlas cluster (`vows_and_venues_production`). Staging and production databases remain completely isolated with zero cross-environment contamination.

B**Payment Gateway Live Credentials**

Replace test API keys with production Razorpay / Cashfree live credentials and generate a production webhook secret. Real card and UPI processing will activate immediately.

C**Search Engine Indexing Activation**

Upon production deployment, the `X-Robots-Tag: noindex` header is automatically disabled on production domain, allowing Google and Bing to index all wedding venues, caterers, and blogs.

D**Production Super Admin Password Change**

Initialize a distinct, high-entropy password for the production Super Admin account. Never reuse staging or test passwords in the production environment.

Client Acceptance Sign-Off:

The Vows & Venues platform has met all functional and architectural specifications. All systems are online and available for testing at <https://vowsandvenues-staging.onrender.com>.
